

I live in a very rural area of northern Alabama and satellite radio is a godsend for our family. I refuse to let my son listen to the only station we can receive on regular radio which has very crude rap and racy music. With XM Satelite Radio, he listens to Disney, XM Kids, and Classical. XM Radio traffic and weather channels were wonderful on our trip to Orlando. It was a long road trip and when we were in a major city area we used the traffic and weather channels to keep us safe and alert to road conditions. XM Satellite Radio is what everybody needs. I support XM Satellite Radio 100 percent!Thank You,
Martha O'Connell
